PART V. PAY-ROLL TAX RETURNS.

A summary statement of employment recorded on Pay-Roll Tax returns for Australia is given, without any adjustment, in the next table.

The returns do not cover employees of the Commonwealth Government, employees whose employers do not pay more than £20 per week in wages and employees in religious and benevolent institutions and hospitals. The proportion of all employees who are included varies from State to State, but for Australia as a whole, the approximate proportions of estimated total employees (other than those of the Commonwealth, those engaged in rural industries and female domestics in private households) in the Pay-Roll Tax returns are 90 per cent. of males and 75 per cent. of females.

Employers' Pay-Roll Tax returns were classified for "industry" according to the industries in which the firms were predominantly engaged.

The table may be taken as indicating trends from month to month, but not as a guide to the absolute numbers employed in the respective industries.
